

## Reference

### To whom it may concern

We, Dana Brugge issue this document as a reference to Metal Technology Group AD (MTG) with the assurance that MTG has been our partner and not only a supplier during the last few years. During this period of time MTG has proved that we did a right decision choosing this company as a producer for some of our most important components, such as:

Impellers, Turbines, Reaction members, Pistons, Covers, etc.

With this letter we would like to point out that MTG is a reliable and flexible partner, with good quality assurance and responsibility for the time scheduling. Furthermore, we would like to assure every future client that he can rely on the long experience, good practice and professionalism, quality production and on time delivery of the products he orders. That is why we recommend MTG as a reliable and trustful partner for the investors.
